The network operators will have to give some consideration to this aspect. 1.5 Explore whether they have the expertise to perform the task. The IT leaders will have to find the best experts in this field. 2.1.4.1 An opportunity to create a business model that includes the cost for the use of IPv4 address {#s0010}

----- The exploration of the opportunity to include the cost for the use of IPv4 addresses for the supply of IPv6 addresses could lead to a new business model. Given that networks are already well equipped to manage IPv4 addresses, the use of them for IPv6 addresses is cost-effective and is a key element to build a sustainable system. The question arises: 'Is it possible to create a new business model that includes the cost for the use of IPv4 addresses?' In addition, given that the increase in use of IPv4 addresses will become significant, it is possible to develop a system that includes the cost of the use of IPv4 addresses. A company might be interested in this option because the use of IPv4 addresses in the network is currently cheap, but it is going to become very expensive. 2.1.4.2 A market opportunity {#s0015} ----- For the few people who are not convinced by the opportunity to create a new business model that includes the cost of the use of IPv4 addresses, a new market opportunity for IPv4 could be explored. The network operators have already a considerable customer base for IPv4 addresses, but now they can add IPv6 addresses. Given that they can give a few percentages of the sale price, they will be able to approach new customers and sell IPv4 addresses with a new business model. 2.1.4.3 The value of the required IP address {#s0020} ----- Given that the IPv4 address range is exhausted, the exploration of the importance of this range becomes important. Is it really important? If it is not important, why is it important? 2.1.4.4 The ability to determine the value of the required IPv4 address {#s0025} ----- The ability to determine the value of the required IPv4 address is important to determine the exchange value of it. 2.2.1.1 A new version of IPv4 {#s0030} ----- The increase of the use of IPv4 addresses in the 82157476af
